
3D Multimedia Sculpture | Term Two, 2024

Explore your ideas using the creativity process in whatever medium you consider usefully appropriate. You will be part of a mixed group working creatively with highly individual interests using a range of materials and working methods to develop new and exciting work. Curiosity and experimental play are fun and productive, so come along and contribute to the creative atmosphere as you develop your work. Previously registered students can continue with current projects. Ideal for beginners.

Content

Content * Introduction to facilities and equipment, and their safe use * Planning a 3D multimedia project - selecting materials and tools * Development of your projects

Objectives

Objectives * Build skills and confidence in creating 3D work in a variety of materials * Develop and complete your 3D projects * Problem-solve and gain new knowledge of materials and skills that you can apply in future projects

Outcomes

Outcomes You'll create your own project brief and develop your project, building competence in working with your chosen materials and the ability to choose and safely use tools and equipment needed to complete your project.
